TRADING VENTURES

STERLING TRADING VENTURES PTY LTD

International timber trading, from source to site

Timber products from partner mills in Asia and Africa, and Australian and New Zealand timber, supplied to importers, distributors and projects around the world.

Global timber, properly traded

The right timber, from the right source, delivered to the right destination.

Buying timber across borders is easy to get wrong. The wrong species, an unchecked mill or missing paperwork can cost a project months and money. We exist to take that risk out.

Sterling Trading Ventures is an Australian international timber trading company. We source from established mills in Asia, Africa, Australia and New Zealand, and supply importers, distributors and projects around the world. We have 16 years of experience in global trade and construction supply.

WHAT YOU CAN COUNT ON

The right material

Matched to your use, climate and standards, not to whatever a mill has in stock.

The right price

Pricing direct from the mill, quoted FOB, CFR or CIF, so you can compare like with like.

Consistent quality

Checked mills, agreed grading, and photos of every pack before it is loaded.

Reliable supply

Realistic lead times, full documents on every shipment, and one point of contact from order to delivery.

Built for buyers who order by the container

Timber shipped direct from the mill to any port, including Australia and New Zealand.

Importers and distributors

Container-load supply direct from the mill, with consistent grading, FOB, CFR or CIF pricing, and full documents on every shipment.

Builders and developers

Hardwood, glulam, treated timber and prefabricated structures for residential and commercial projects, supplied to your specification and programme.

Hotels and resorts

Decking, glulam, pavilions, cladding and marine timber brought together into one supply programme for your project.

We also supply joinery and furniture manufacturers, and marine, civil and infrastructure contractors.

WHERE WE SOURCE

Asia	Hardwood glulam, merbau, yellow balau, kapur, meranti, keruing and bamboo
Africa	Sapelli, iroko, okan, tali and azobé, and treated eucalyptus from South Africa
Australia	Hardwood, treated timber, sleepers and poles
New Zealand	Radiata pine, and treated and thermally modified timber
Where we ship	Australia and New Zealand, Asia, the Middle East, Africa, and the Pacific and Indian Ocean islands, or any other port. Timber ships direct from the mill, without passing through Australia unless it needs to.

Six ranges from our partner mills

Shipped by the container, direct from the mill to any port, including Australia and New Zealand.

Hardwood glulam

Straight and curved beams and posts in merbau and African hardwoods, with engineering through our partners.

Prefabricated timber structures

Pergolas, pavilions, villas and modular buildings, cut and drilled ready to assemble.

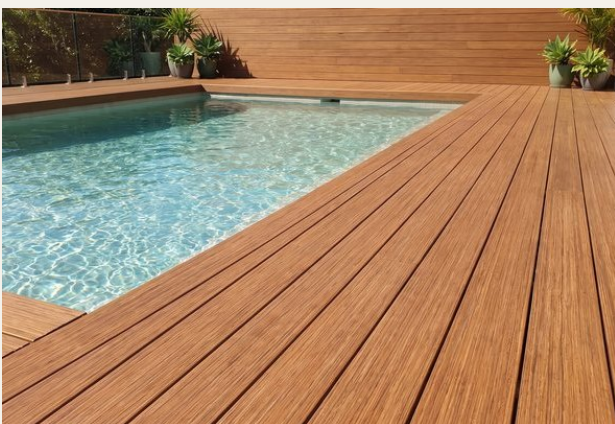

African hardwoods

Sapelli, iroko, okan, tali and azobé for joinery, marine and heavy structural work.

Asian hardwoods

Merbau (kwila), yellow balau, kapur, meranti and keruing for decking, joinery and construction.

Bamboo decking and cladding

Strand woven bamboo, dense and stable, for decks, facades and resort projects.

Eucalyptus poles and fencing

Treated poles, laths and posts from South African plantations, for vineyards, farms and fencing.

Australian and New Zealand timber, exported

Plantation pine, treated timber and some of the world's toughest hardwoods, for importers and projects in any country.

Radiata pine	Kiln dried structural grades such as MGP10 and MGP12, plus appearance and packaging grades.
Treated timber H3 to H6	Posts, poles, decking and marine timber, treated to AS 1604.1 or NZS 3640 with CCA, ACQ or copper azole.
Thermally modified timber	Heat-treated cladding and decking, stable and durable with no chemical preservatives.
Australian hardwood	Spotted gum, blackbutt, jarrah, ironbark and Tasmanian oak for decking, cladding and structure.
Sleepers and poles	Hardwood and treated pine for rail, utilities, civil works and landscaping.

Exported by the container to Asia, the Middle East, Africa, and the Pacific and Indian Ocean islands, or any other port, quoted FOB, CFR or CIF.

From your requirements to your port or site

Five steps, one point of contact, and clear terms from the first enquiry to the day the container arrives.

01	Understand your requirements	The use, loads, exposure, standards, quantities, budget, destination and timing.
02	Assist with engineering	If required, through our timber engineering partners. Approvals stay with you and your designer.
03	Find the right timber	The species, grade and treatment that suit the job and the price, quoted within two working days.
04	Check the mill	Capacity, quality, grading and legality, with photos of the packs before loading.
05	Deliver to port or site	Shipped direct from the mill with full documents, anywhere in the world.

Support beyond the supply

Sourcing, engineering and supervision, anywhere in the world.

Project sourcing

We find the right species, check the mill and manage the supply chain, from the first drawing to the last delivery.

Site supervision

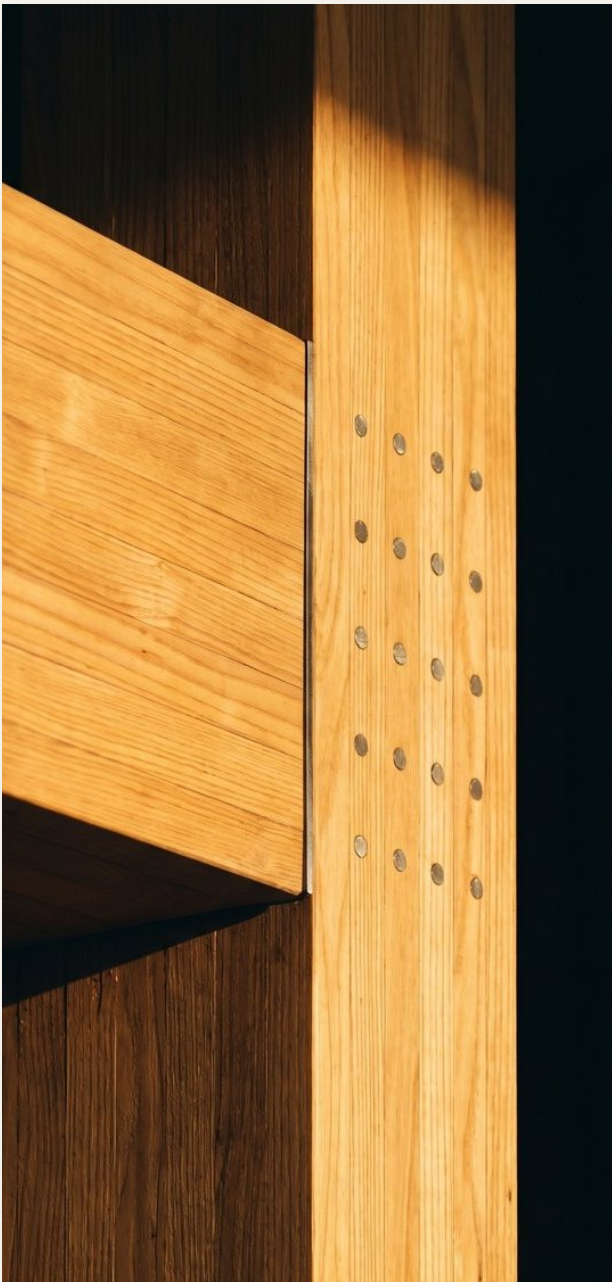

Project supervision and timber installation supervision on site, anywhere in the world. Your own builder installs the timber.

Engineering through partners

Timber engineering and shop drawings through our timber engineering partners. Approvals stay with you and your designer.

Hotels and resorts

Decking, glulam structures, pavilions, cladding and marine timber for resort, villa and restaurant projects.

The terms at a glance

Clear terms, agreed in writing before we confirm an order.

Minimum order	One container, 20 or 40 foot, depending on the lengths required.
Lead time	Typically 4 to 8 weeks from confirmed order to your port, depending on requirements.
Shipping terms	FOB, CFR or CIF under Incoterms 2020, to any port.
Before loading	Photos of the packs, so you see the timber before it ships.
Documents	Legality due diligence file, certificate of origin, packing list, and phytosanitary, treatment or fumigation certificates where the destination requires them.
Quote reply	Within two working days.

Where certified timber is required, we source from FSC or PEFC certified mills and pass the mill’s certificates on to you. Sterling does not hold these certifications itself.
